

MIR JASIMUDDIN

Senior UiPath RPA Developer | Agentic AI Automation Specialist | 4 Years Experience

i.mir.jasim.uddin@gmail.com | +91 9382859763 | Kolkata, India

[LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior UiPath RPA Developer with 4 years of hands-on, end-to-end experience in designing, developing, and deploying enterprise-grade automation solutions at Capgemini and Tata Consultancy Services. Deep expertise across the complete UiPath ecosystem — Studio, Orchestrator, AI Center, Maestro, Agent Builder, ScreenPlay, IXP (Extraction Agents and Validation Agents), REFramework, Document Understanding, Test Cloud, and GenAI Autopilot. UiPath Certified Agentic Automation Associate with a strong record of delivering scalable, intelligent, autonomous workflows using Agentic AI, queue-based and data-driven automation, API Workflows, AI Trust Layer governance, and PII masking. Experienced in end-to-end process migration, multi-system integrations, and CI/CD-enabled deployments. Recognized UiPath community contributor with 5x Monthly Forum Rewards.

KEY TECHNICAL SKILLS

UiPath Platform: UiPath Studio, UiPath Studio Web, UiPath Orchestrator, UiPath AI Center, UiPath Test Cloud, UiPath Automation Cloud

Agentic AI: UiPath Maestro (BPMN/DMN Orchestration), UiPath Agent Builder, UiPath ScreenPlay (Natural Language UI Automation), Healing Agent, Autopilot for Developers

Intelligent Document Processing: UiPath IXP – Extraction Agents, Validation Agents, Document Understanding, ML Model Integration

Automation Frameworks: REFramework, Queue-Based Workflows, Data-Driven Automation, State Machine Workflows, Dispatcher-Performer Architecture

Security & Governance: UiPath AI Trust Layer, PII Masking, Agent Guardrails, Audit Controls, CyberArk Privileged Access Management

Integration & APIs: UiPath API Workflows, REST API Automation, MCP Server Integration, System-to-System Integration

Databases & Backend: SAP HANA, MariaDB, SQL, MySQL

DevOps & CI/CD: CI/CD Pipeline Integration, Git, Version Control, Agile (Scrum)

Programming: Visual Basic (VBA), Python, SQL

Other Tools: Automation Anywhere (exposure)

Domain Expertise: Utility, Reporting Automation, Document Management, Auditing, Regression Testing, Case Processing

Soft Skills: Stakeholder Collaboration, Process Analysis, Solution Design, Technical Documentation (PDD, SDD, UAT), Mentoring, Problem Solving

CERTIFICATIONS

- UiPath Certified Professional – Agentic Automation Associate
- UiPath Community Certification Framework – Specialized AI Professional
- UiPath Academy – Automation Business Analyst Associate
- Automation Anywhere – Certified Master RPA Professional Prep

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Limited | Kolkata, India

Senior Associate – Senior UiPath RPA Developer | Jan 2025 – Present

- Designed, developed, and deployed end-to-end UiPath automation solutions leveraging Maestro for BPMN/DMN-based agentic orchestration, Agent Builder for low-code and coded agent creation, and ScreenPlay for natural-language UI automation, delivering adaptive and autonomous enterprise workflows.
- Integrated AI-driven UiPath agents, attended and unattended robots, and human-in-the-loop tasks into complex multi-system processes using UiPath Studio, Orchestrator, and AI Center, optimizing for scalability, performance, and intelligent decision-making.
- Enforced UiPath AI Trust Layer governance policies including real-time PII masking, agent guardrails, and unified audit controls, ensuring enterprise-grade security and compliance in regulated client environments.
- Built UiPath API Workflows for high-volume system-to-system integrations, combining RPA and agentic processes within a unified UiPath development environment to significantly reduce integration turnaround time.
- Leveraged UiPath Autopilot for Developers within Studio IDE to accelerate workflow scaffolding, expression generation, and debugging, improving delivery speed and code quality across projects.
- Designed and optimized REFramework-based queue-driven workflows with robust exception handling, retry logic, and secure credential management for high-reliability production automation.
- Led requirements gathering, authored Process Definition Documents (PDD) and Solution Design Documents (SDD), and drove UAT cycles through to successful production go-live.

Tata Consultancy Services | Kolkata, India

System Engineer – UiPath RPA Developer | Jul 2022 – Jan 2025

- Developed and enhanced UiPath automation solutions for an enterprise utility client, building scalable attended and unattended bots with secure credential management and seamless integration across enterprise applications.
- Led end-to-end UiPath process migration from on-premises Orchestrator to cloud infrastructure, ensuring zero downtime and full continuity across all production automation processes.
- Progressed from UiPath production support to full-cycle RPA development — independently designing, building, testing, and deploying automations across multiple business units.
- Resolved complex UiPath production issues through proactive bot monitoring, root cause analysis, and workflow performance tuning, maintaining high availability for critical business processes.
- Designed UiPath workflows for enterprise backend system automation, enhancing process compatibility and operational throughput across large-scale data environments.
- Implemented secure credential handling within UiPath bots using enterprise PAM integration, ensuring compliant and rotation-safe authentication across all automated processes.
- Produced complete technical documentation including PDD, SDD, and UAT test scripts, ensuring end-to-end traceability from business requirements through production deployment.

KEY PROJECTS

Capgemini Projects

Regression Automation – Client Golden Test Suites (Jan 2026 – Present)

- Automated client Golden Test Suites using UiPath Test Cloud with self-healing automation, AI Computer Vision, and agentic performance testing, building stable and scalable regression coverage across enterprise applications.
- Implemented REFramework with queue-based dispatching, IXP Extraction Agents, Validation Agents, and GenAI Autopilot within UiPath, integrated with CI/CD pipelines for continuous automated regression validation.

Reporting and Data Repository Automation (Sep 2025 – Dec 2025)

- Designed and automated enterprise reporting workflows using UiPath Orchestrator, configuring queue management and scheduled bot execution for centralized, scalable, and performance-optimized reporting automation.
- Built UiPath API Workflows for automated system-to-system data transfers, eliminating manual data handling and significantly improving reporting accuracy and delivery speed.

Auditing Automation (Jul 2025 – Aug 2025)

- Delivered UiPath-driven auditing automation in the production environment using IXP Validation Agents for AI-enabled document validation, incorporating audit bypass handling and compliance-driven process checks under AI Trust Layer governance.

Case Update Automation (May 2025 – Jun 2025)

- Implemented UiPath automation with Maestro orchestration for large-scale case updates across enterprise systems in production, ensuring high accuracy, consistency, and significantly reduced turnaround time.

Document Management and Case Processing (Mar 2025 – Apr 2025)

- Designed and deployed UiPath IXP workflows for intelligent document management and contingency case processing, leveraging Extraction Agents and robust exception handling to automate complex document-intensive operations.

UiPath Environment Setup and Intake Automation (Jan 2025 – Feb 2025)

- Completed full VDI and UiPath Orchestrator environment setup from scratch and automated intake processes using UiPath API Workflows for scan, fax, and email channels with Orchestrator queue management and validation.

TCS Projects

RPA New Process Development (Apr 2024 – Dec 2024)

- Designed and deployed multiple enterprise UiPath automation processes covering full-cycle development — from requirements analysis through UAT to production deployment — across diverse business automation use cases.

RPA Migration – On-Premises to Cloud (Jan 2024 – Mar 2024)

- Migrated existing UiPath bot infrastructure from on-premises Orchestrator to UiPath Automation Cloud with zero downtime, maintaining full process continuity and governance standards throughout.

Enterprise Backend System Automation (Aug 2023 – Dec 2023)

- Developed and optimized UiPath workflows for large-scale enterprise backend system automation, enhancing process compatibility, selector stability, and runtime performance across critical business operations.

Secure Credential Integration (Mar 2023 – May 2023)

- Integrated enterprise PAM-based secure credential management into UiPath bots, enforcing compliant and rotation-safe authentication standards across all automated processes.

RPA Process Map Upgradation (Jun 2023 – Jul 2023)

- Re-architected and enhanced UiPath workflows across multiple automations, updating selectors, process maps, and component libraries to improve reliability and system compatibility.

RPA Production Support and Initial Process Development (Jul 2022 – Feb 2023)

- Provided proactive UiPath production monitoring, bot troubleshooting, and performance optimization; designed and deployed initial automation workflows from business requirements through to production go-live.

COMMUNITY LEADERSHIP AND RECOGNITION

- 5x UiPath Monthly Forum Rewards Winner – Recognized for consistent, high-impact technical contributions to the global UiPath Community Forum.
- Active UiPath Community Forum contributor – Regularly solving complex UiPath automation challenges and sharing REFramework, Agentic AI, IXP, and Orchestrator best practices with the global RPA community.
- Delivered freelance training and mentorship on UiPath RPA, Agentic AI, and GenAI automation frameworks to aspiring automation developers.
- Published a 100-day LinkedIn automation series focused on UiPath RPA, Agentic AI, and GenAI adoption – recognized as a thought leader in UiPath-driven AI and automation convergence.
- Subject matter expert and community voice for UiPath Maestro, Agent Builder, ScreenPlay, and IXP across professional channels.

EDUCATION

Bachelor of Technology (B.Tech)

Maulana Abul Kalam Azad University of Technology, Kolkata | 2018 – 2022

KEY TECHNICAL SKILLS — NEW ADDITIONS

Coded Agents: UiPath Coded Agents, Coded Workflows, Code-First Automation, C# SDK Integration, Custom Activity Development

Claude Code Integration: Claude Code with UiPath, AI-Native Workflow Scaffolding, GenAI-Powered Automation Design, MCP Server Integration, Claude API for Automation Intelligence

Maestro Case Management: Case Lifecycle Orchestration, Case Intake & Routing, Escalation Workflows, BPMN/DMN Decision Logic, Case Resolution Automation

Terminal Operations: Terminal-Based RPA Orchestration, CLI-Driven Automation, SSH Automation, Script Execution via UiPath, Bash/PowerShell Integration

External API Integration: REST API Automation, Webhook-Driven Automation, Third-Party API Orchestration, MCP Server Integration, System-to-System Data Flows

PROFESSIONAL EXPERIENCE — ADDITIONAL RESPONSIBILITIES

Senior Associate – Senior UiPath RPA Developer | Capgemini Technology Services India Limited | Kolkata,

- Built UiPath Coded Agents and coded workflows using C# SDK, enabling full programmatic control over automation logic, custom activity development, and seamless integration with enterprise APIs and microservices.
- Integrated Claude Code with UiPath to enable AI-native automation design — leveraging Claude API for workflow scaffolding, intelligent exception resolution, and GenAI-powered process optimization within Studio IDE.
- Developed and deployed terminal-based RPA orchestration pipelines — automating SSH sessions, CLI-driven script execution, PowerShell/Bash automation, and headless server-side operations via UiPath.
- Built external REST API integrations and MCP server connections for high-volume third-party system-to-system data flows, webhook-driven automation, and multi-platform process orchestration.
- Implemented UiPath Maestro Case Management for enterprise case lifecycle orchestration — managing case intake, routing, escalation, and resolution workflows with BPMN/DMN decision logic across production environments.

KEY PROJECTS — ADDITIONS

Capgemini Projects

Maestro Case Management Automation (Closes: Case Update Automation) May 2025 – Jun 2025

- Implemented UiPath Maestro Case Management for large-scale enterprise case lifecycle orchestration — managing case intake, routing, escalation, and resolution workflows across multi-system production environments.
- Leveraged BPMN/DMN decision logic within Maestro to automate complex case routing rules, ensuring high accuracy, consistency, and significantly reduced case turnaround time. Project closed successfully.

Claude Code Integration & External API Automation (Closes: UiPath Environment Setup and Intake Automation) Jan 2025 – Feb 2025

- Completed full VDI and UiPath Orchestrator environment setup and automated intake processes using API Workflows for scan, fax, and email channels with Orchestrator queue management and validation.
- Integrated Claude Code for AI-native workflow scaffolding and intelligent process design, and developed external REST API integrations with MCP server connections for third-party system automation. Project closed successfully.

Coded Agent Development – Enterprise Automation Ongoing

- Developed UiPath Coded Agents and coded workflows using C# SDK for enterprise clients at Capgemini, delivering programmatic automation control, custom activity development, and deep API/microservice integration beyond low-code capabilities.

Terminal & CLI Automation Pipelines Ongoing

- Built terminal-based RPA orchestration pipelines automating SSH sessions, CLI-driven script execution, PowerShell and Bash automation, and headless server-side operations within UiPath for enterprise backend environments.
